HTML IMAGES

UNDERSTANDING TAGS AND CONTENT

HTML IMAGES SYNTAX

- The HTML `<img>` tag is used to display images on a webpage.
- Images are linked, not directly embedded, and the tag serves as a placeholder.
- It is an empty tag with no closing tag and only contains attributes.
- The `src` attribute specifies the image file path.
- The `alt` attribute provides alternative text for the image.

```

```

HTML IMAGES

- Use the HTML element to define an image
- Use the HTML src attribute to define the URL or path of the image
- Use the HTML alt attribute to define an alternate text for an image, if it cannot be displayed
- Use the HTML width and height attributes or the CSS width and height properties to define the size of the image
- Use the CSS float property to let the image float to the left or to the right

```
<p>
The image will float to the right of the text.</p>
```
