HTML ATTRIBUTES

ADDING EXTRA INFORMATION TO ELEMENTS

WHAT ARE ATTRIBUTES?

Attributes provide additional information about elements

Syntax:

```
<tag attribute="value">content</tag>
```

- Always in start tag
- Name/value pairs (name="value")
- Usually lowercase

THE SRC AND ALT ATTRIBUTES (IMAGES)

``

↑ ↑

image source alternative text

```
src = file path to image  
alt = description (for screen readers/broken  
images)
```

THE STYLE ATTRIBUTE

```
<p style="color:red;">Red text</p>
```

CSS styling

Changes appearance: color, size, font, etc.

COMMON HTML ATTRIBUTES

Attribute	Used On	Purpose
href	<code><a></code>	Link destination
src	<code></code>	Image file path
alt	<code></code>	Alternative text
style	Most elements	CSS styling
class	Most elements	CSS class reference
id	Most elements	Unique identifier
