MODULE 6: LAYOUT AND STRUCTURE

BLOCK-LEVEL ELEMENTS

- Starts on a new line with automatic spacing (margin)
- Occupies full available width
- Common examples: `<p>` and `<div>`
- `<p>` is used for paragraphs
- `<div>` is used for sections or divisions
- Both `<p>` and `<div>` are block-level elements

```
<p>Hello World</p>
```

```
<div>Hello World</div>
```

INLINE ELEMENTS

- An inline element does not start on a new line.
- An inline element only takes up as much width as necessary.
- This is a `<span>` element inside a paragraph.

`<span>Hello World</span>`

Note: An inline element cannot contain a block-level element!

THE ELEMENT

- is an inline container for parts of text or a document
- It has no required attributes
- Commonly uses style, class, and id

```
<p>My mother has <span style="color:blue;
font-weight:bold;">blue</span> eyes and
my father has <span style="color:darkolivegreen;
font-weight:bold;">dark green</span> eyes.</p>
```
