HTML EDITORS

TOOLS TO WRITE HTML CODE

SIMPLE TEXT EDITORS (FOR LEARNING)

Recommended for beginners:

Windows: Notepad

Mac: TextEdit

Why? It teaches you to write code manually

No auto-complete - you learn the syntax!

HOW TO USE NOTEPAD (WINDOWS)

Step 1: Open Notepad

- Windows 8+: Type "Notepad" in Start Screen
- Windows 7: Start > Programs > Accessories > Notepad

Step 2: Write HTML code

Step 3: Save as "index.html"

- File > Save As
- Name: index.html
- Encoding: UTF-8

Step 4: Open in browser (double-click the file)

HOW TO USE TEXTEDIT (MAC)

Step 1: Open TextEdit

- Finder > Applications > TextEdit

Step 2: Change Preferences

- Preferences > Format > "Plain Text"

Step 3: Under "Open and Save"

- Check "Display HTML files as HTML code"

Step 4: Write code and save as .html

PROFESSIONAL HTML EDITORS

For serious development:

- VS Code (Free, most popular)
- Sublime Text
- Atom
- WebStorm

Features: syntax highlighting, auto-complete, live preview
