MODULE 2: HTML BASICS

HTML BASIC EXAMPLES

BUILDING YOUR FIRST WEB PAGE

HTML DOCUMENTS

All HTML documents MUST start with:

```
<!DOCTYPE html>
```

Then the structure:

```
<html>
```

```
<body>
```

```
... visible content ...
```

```
</body>
```

```
</html>
```

THE <!DOCTYPE> DECLARATION

Purpose: Tells the browser which HTML version to use

For HTML5 (current version):
<!DOCTYPE html>

NOT case sensitive

Must be at the VERY TOP of the page

Appears only ONCE

HEADINGS IN HTML

`<h1>`Most important heading`</h1>`

`<h2>`Heading 2`</h2>`

`<h3>`Heading 3`</h3>`

`<h4>`Heading 4`</h4>`

`<h5>`Heading 5`</h5>`

`<h6>`Least important heading`</h6>`

PARAGRAPHS IN HTML

```
<p>This is a paragraph.</p>
```

```
<p>This is another paragraph.</p>
```

Note: Browsers automatically add blank lines before and after paragraphs.

HOW TO VIEW HTML SOURCE

Method 1: CTRL + U (Windows/Linux)
Command + U (Mac)

Method 2: Right-click → "View Page Source"

Method 3: Right-click → "Inspect" (see live code)

Great way to learn from other websites!
