HTML PARAGRAPHS

ADDING TEXT CONTENT

THE <P> ELEMENT

```
<p>This is a paragraph.</p>
```

```
<p>This is another paragraph.</p>
```

- Always starts on a new line
- Browsers add margin before/after
- Block-level element

LINE BREAKS VS PARAGRAPHS

Using `<br>` (line break):

```
<p>Line 1<br>Line 2<br>Line 3</p>
```

Result: Line 1

Line 2

Line 3 (no extra space)

`<p>` is for separate paragraphs (has spacing)

`<br>` is for line breaks inside same paragraph
