HTML TEXT FORMATTING

BOLD, ITALIC, AND MORE

FORMATTING ELEMENTS OVERVIEW

Tag	Effect
<code></code>	Bold text
<code></code>	Important (bold)
<code><i></code>	Italic text
<code></code>	Emphasized (italic)
<code><mark></code>	Highlighted
<code><small></code>	Small text
<code></code>	Deleted (strikethrough)
<code><ins></code>	Inserted (underlined)
<code><sub></code>	Subscript
<code><sup></code>	Superscript

BOLD AND STRONG

`<b>This text is bold</b>` (no extra meaning)

`<strong>This text is important!</strong>`
(bold + semantic meaning)

Result: Both look bold, but `<strong>` has
screen reader emphasis

ITALIC AND EMPHASIZED

`<i>This text is italic</i>` (technical terms, thoughts)

`<em>This text is emphasized</em>` (verbal stress by screen readers)

Result: Both look italic, but `<em>` has semantic meaning

MARK, DEL, INS

`<mark>Highlighted text</mark>`

`<del>Deleted text</del>` (strikethrough)

`<ins>Inserted text</ins>` (underlined)

Example:

`<p>My favorite color is blue
<ins>red</ins>.</p>`

Result: My favorite color is ~~blue~~ red.

SUBSCRIPT AND SUPERScript

`H<sub>2</sub>O` → H₂O (water)

`E = mc<sup>2</sup>` → E = mc² (exponent)

- `<sub>` = text half character BELOW normal line
- `<sup>` = text half character ABOVE normal line
